Zoom ADSL USB Modem

Model 5510B

The Zoom ADSL USB Modem Model 5510B connects your computer with ADSL service to provide a high-speed "always on" connection to the Internet. The Model 5510B connects easily to any Windows® or Macintosh® computer with an available USB port. Then simply plug into any phone jack with ADSL service, run the software wizard provided and you're ready for instant access to the Internet!

The installation wizard software is pre-configured for many countries and service providers. Just select from the list and the installation wizard automatically configures the network settings. If a provider is not listed, the installation wizard makes it easy to enter the settings for your ADSL service.

Documentation and software are provided in English, Spanish, German, French, Portuguese and Turkish.

Package contents:

- USB modem
- USB cable
- Phone cable
- CD ROM disc
- User documentation
- Filters and Phone Adapters:
  Filters and/or phone adapters may be included in some markets. Please check the package for specifics or ask your dealer. An ADSL filter allows a telephone, facsimile machine, or other telephone instrument to be used even when you are online with your ADSL modem.
