Phone Adaptor for Skype

Skype's great. Skype with your favorite phones is even better.

Model 5900

If you have Skype, you know that it runs on your PC to make phone calls easier and less expensive. If you're using a headset with Skype, you probably wish you could use normal phones. Now you can!

The Zoom Phone Adaptor for Skype lets you use your favorite phone(s) with Skype. You can plug a normal phone into the adaptor, and then make or receive calls using that phone. You can even plug in a cordless base station for 1, 2, 4, or even more cordless phones, and then make or receive calls using any of those phones!

The Zoom Phone Adaptor is easy to install and use, but it's very powerful, especially if you choose to plug the adaptor into normal phone service. Powerful bridging functions allow Skype calls to be remotely accessed from mobile phones and other conventional phone numbers. This lets you use a mobile phone ("cell phone") to make calls using Skype and save lots of money, or other phones remote from your PC.

Security on bridged calls is provided using Touchtone™ password protection.

Voice mail for both Skype and conventional calls is provided by the Model 5900, with storage and management of the voice messages on the PC. The voice mail interface and system administration prompts are provided in fourteen languages with automatic installation based on the language used for the operating system.

The Model 5900 is USB port powered to reduce power adaptor clutter. The compact size allows convenient placement in any setting.

There's no better time than now to extend the power of Skype. And there's no better way than with the Zoom Phone Adaptor for Skype.

Adds a second phone line to existing phones

Use cordless or corded telephones to make and receive Skype calls

Displays caller's name on incoming VoIP calls

Allows switching between Skype and conventional (PSTN) calls

Three-way conferencing using PSTN and Skype lines and an ordinary phone

PSTN-to-Skype call bridging

Interactive Voice Response for voice mail access and phone system control

Provides consolidated Skype and PSTN voice mail storage on a local PC

Skype certified.

Use Normal Phones for Skype

It's easy to extend the power and convenience of Skype:

1. Install the included software.

2. Plug the Adaptor into your computer's USB port.

3. Plug your favorite phone or cordless base station into the Adapter.

4. If you like, plug the Adaptor into a phone jack to:
   - extend Skype capabilities to mobile phones;
   - allow the phone to be used for both Skype and conventional phone calls;
   - add conferencing and call forwarding using Skype with conventional phone service

5. Enjoy the power, convenience, and low cost of Skype!
